

Anthony Owen is a nationally recognized leader in computer science education policy and currently serves as **Head of Policy at Code.org**, a role he assumed in January 2026, and **President of the Code.org Advocacy Coalition**. With nearly two decades of experience across local, state, and national education systems, he has played a central role in expanding equitable access to K–12 computer science nationwide.

At Code.org, Anthony leads state and federal policy strategy, builds bipartisan coalitions, and advances legislative efforts that have secured computer science graduation requirements, dedicated funding, and policy protections in states such as Louisiana, Alabama, Minnesota, and Arkansas. He is widely regarded as a trusted advisor to governors, legislators, and education leaders.

From 2015 to 2022, Anthony served as Arkansas’s first **State Director of Computer Science Education**, partnering with Governor Asa Hutchinson to implement the state’s nationally recognized CS initiative. Anthony has served on national boards and advisory groups, including the **Computer Science Teachers Association**, the **K–12 Computer Science Framework**, the **Southern Regional Education Board**, and the **National CTE Advisory Council**. A former math and science teacher, his work is grounded in classroom experience and a commitment to student opportunity.

He holds degrees in Mathematics, Educational Leadership, and Law, and lives in Bryant, Arkansas with his wife, Michele, and their two sons.
